VOLUME 13 1984

SUBJECT INDEX

Acetylcholinesterase, 163
  cytoarchitecture
  histochemistry
  interpeduncular nucleus
  norepinephrine
AChE-pharmacohistochemistry, 503
  interpeduncular nucleus
  subnuclear organization
Acute estrogen negative feedback, 363
  LH secretion
  monoamine metabolism
  ovariectomy
Adenosine receptors, 657
  autoradiography
  nitrobenzylthioinosine
  nucleoside transport sites
Adrenal medulla, 299
  immunocytochemistry
  serotonin-immunoreactivity
Adrenalectomy, 33
  B50
  hippocampus
  membrane phosphorylation
α_2-Adrenoceptors, 293
  angiotensin II-induced drinking
  drug interaction
  octopamine
  synephrine
Afferents, 527
  fast blue
  immunocytochemistry
  retrograde transport
Afterdischarges
  brain stimulation, 519
  cats, 519
  epilepsy, 519
  ethanol, 519
  limbic system, 519, 635
  phencyclidine, 635
  rhesus monkeys, 635
Age differences, 135
  ependymal cells
  fine structure
  glial cells
  subfornical organ
Aging
  catecholamine, 727
  methylazoxymethanol, 383
  microencephaly, 383
  monoamine metabolism, 383
  monoamine neurons, 383
  regeneration, 727
  reinnervation, 727
Amino acids, 421
  cortex
  cortical perfusion
  push-pull perfusion
AMP, 199
  ATP
  hippocampal neurones
  nucleotides
  purines
Androgens, 185
  gerbils
  lesions, sexually dimorphic area
  scent marking
  sexual behavior, male gerbils
Angiotensin II, 127
  drinking
  hypothalamus
  phentolamine
  pressor responses
Angiotensin II-induced drinking, 293
  α_2-adrenoceptors
  drug interaction
  octopamine
  synephrine
Animal anesthesia, 457
  methoxyflurane
  neurotoxins
  stereotaxic surgery
Animal model, 443
  Huntington's disease
  neurotoxins
  L-pyroglutamate
Anisomycin, 39
  dentate gyrus
  long-term potentiation
  protein synthesis inhibition
Antibody titre, 247
  fever
  immune system
  temperature regulation
Antidromic activation, 613
  interstitial nucleus of Cajal
  Probst's tract
Apparatus
  computer-assisted image analysis, 743
  methoxyflurane delivery system, 457
  rat brain slicer, 195
  stereotaxic headholders, 457
Apple™ computer, 205
  data acquisition
  histograms
  microcomputers
  real-time data analysis
Arcuate nucleus, 49
  prolactin
  taurine
Area postrema
  bovines, 357
  cats, 391
  FMRF-NH_2, 391
  immunohistochemistry, 391
  monoamines, 357
  neurotransmitters, 357
Arousal, 549
  cortical spindles
  genetic factors
Atlas, 1
  brainstem
  cat
  serotonergic cell bodies
ATP, 199
  AMP
  hippocampal neurones
  nucleotides
  purines
Auditory evoked potentials, 155
  chronic administration
  medial geniculate body
  phencyclidine
  rhesus monkeys
Autoradiographic localization, 69
  benzodiazepine binding sites
  cat brain
  [^{3}H] PK 11195
Autoradiography
  adenosine deaminase, 657
  nitrobenzylthioinosine, 657
  nucleoside transport sites, 657
  opioid peptide-receptor, 801
  rhesus monkeys, 801
Axotomy, 487
  glycine receptors
  hypoglossal nucleus
  regeneration

B50, 33
  adrenalectomy
  hippocampus
  membrane phosphorylation
Benzodiazepine binding sites, 69
  autoradiographic localization
  cat brain
  [^{3}H] PK 11195
Binding, 481
  hypothalamus
  opiate receptors
Blood pressure, 257
  brain acetylcholine
  methyldopa
  spontaneously hypertensive rats
  turnover rates
Body weight, 591
  clonidine
  drinking
  eating
  hypothalamus
  norepinephrine
  paraventricular nucleus
Bovines, 357
  area postrema
  monoamines
  neurotransmitters
Bradycardia, 371
  cortical stimulation
  ^{3}H-2-deoxyglucose uptake
  depressor responses
  rabbits
Brain
  adrenal medulla, 299
  amygdala, 519, 635, 751
  anterior hypothalamus, 185
  anterior medial cortex, 371
  arcuate nucleus, 49
  area postrema, 357, 391, 401
  basal ganglia, 319, 443
  brainstem, 1, 401, 413, 559, 573
  caudal brain stem, 353
  caudate putamen, 269, 443

central amygdaloid nucleus, 147
central autonomic nuclei, 437
central gray area, 1
central nervous system, 49, 383, 497, 573, 673
cerebellum 181, 229
cerebral cortex, 383, 481, 709, 751
cerebral ventricle, 43
cervical spinal cord, 701
cingulate, 371
cortex, 147, 155, 421
dendrite bundles, 701
dentate gyrus, 39, 743
diencephalon, 565
dorsal motor nucleus, 573
dorsal nucleus of lateral lemniscus, 585
dorsal pons, 1
dorsal root ganglion, 573
dorsal subiculum, 743
dorsal vagal nuclei, 391
dorsolateral tegmentum, 527
dorsomedial, 363
fornix, 43
globus pallidus, 269, 493
habenular nuclei, 629
hippocampus, 33, 93, 199, 241, 383, 519, 635, 743, 751, 833
hypoglossal nucleus, 487
hypothalamus, 49, 127, 257, 363, 481, 491, 651, 673, 785
inferior olivary complex, 1
insular cortex, 371
interpeduncular nucleus, 1, 163, 203, 503
interstitial nucleus of Cajal, 613
laryngeal nerve, 413
lateral habenula, 623
lateral hypothalamus, 509
lateral hypothalamus-lateral preoptic area, 565
lateral reticular nucleus, 1
limbic telencephalon, 751
locus coeruleus, 433, 437, 527
medial entorhinal cortex, 39
medial habenula, 527
medial hypothalamus, 565
medial longitudinal fasciculus, 613
medial preoptic area, 185, 363
median eminence, 363
mediodorsal nucleus of thalamus, 371
medulla oblongata, 257
mesencephalon, 1, 565
midbrain, 257, 565
midbrain reticular formation, 635
nodose ganglion, 401, 573
nucleus accumbens, 269
nucleus ambiguus, 573
nucleus incertus, 527
nucleus locus coeruleus, 53
nucleus tractus solitarius, 357, 401
olfactory bulb, 541
optic chiasma, 629
parabrachial nuclei, 437
paraventricular nucleus, 437, 591
phrenic nucleus, 701
Brain
pineal, 629
pons, 53, 257
posteromedial hypothalamus, 509
preoptic area, 93, 353
preventricular magnocellular nucleus, 509
Probst's tract, 613
Purkinje neuron, 181
pyramidal tract, 1
raphe nuclei, 1, 437, 559, 623, 709, 737
rostral brain stem, 353
septum, 43, 257, 339, 509, 519
solitary nucleus, 573
solitary tract, 391
striatum, 257, 269, 383, 497
subfornical organ, 43, 135
subiculum, 93, 833
subnuclei, 203
substantia nigra, 309, 319, 737
superior cervical sympathetic ganglion, 573
suprachiasmatic, 363
supraoptic nucleus, 727
sympathetic preganglionic neurons, 559, 679
thalamus, 257, 635
thalamus-zona incerta area, 565
vagus nerve, 401, 413
ventral medulla, 1
ventral reticular formation, 559
ventromedial nucleus, 673
Brain acetylcholine, 257
blood pressure
methyldopa
spontaneously hypertensive rats
turnover rates
Brain development, 541
mitral cell layer
odor exposure
olfactory bulbs
pheromones
Brain regions, mice, 253
energy metabolism
microwave irradiation
Brain spectrin, 813
cytoskeleton
neuroblastoma
neurochemistry
Brain stimulation, 519
afterdischarges
cats
epilepsy
ethanol
limbic system
Brainstem, 1
cats
immunocytochemistry
serotonin
Brainstem motoneurons, 413
cricothyroid muscle
laryngeal nerve
monkeys
Bursting activity, 493
jaw movements
multiunit analysis
pallidum
stereotypy

CA innervation, 701
cervical spinal cord
dendrite bundles
phrenic nucleus
Calcium-binding protein, 181
cerebellum
immunocytochemistry
organotypic cultures
Cardiovascular control, 679
cats
oxytocin
sympathetic preganglionic neurons
vasopressin
Cat brain, 69
autoradiographic localization
benzodiazepine binding sites
[^{3}H] PK 11195
Catecholamines
aging, 727
dopamine, 235
norepinephrine, 235
ovariectomy, 235
pulsatile LH release, 235
regeneration, 727
reinnervation, 727
Cats
after discharges, 519
area postrema, 391
brain stimulation, 519
brainstem, 1
cardiovascular control, 679
2,4-dinitrophenol, 461
enkephalin, 319
D-Ala^2-D-Leu^5-enkephalin, 263
epilepsy, 519
ethanol, 519
FMRF-NH_2, 391
hypothermia, 461
ICV injection, 461
immunocytochemistry, 1
immunohistochemical localization, 319
immunohistochemistry, 391
in vitro, 331
interpeduncular nucleus, 203
lateral habenula, 623
lesions, pontine, 53
limbic system, 519
monkeys, 319
muscimol binding sites, 331
ontogenesis, 331
opioid receptors, 263
oxytocin, 679
paradoxical sleep, 53
pineal recess, 623
reticular formation, 53
serotonin, 1
sleep-wakefulness states, 53
slow wave sleep, 623
subnuclei, 203
substance P, 319
substantia nigra, 319
sympathetic preganglionic neurons, 679
thermoregulation, 263
vasopressin, 679
vasotocin, 623
visual cortex, cat, 331
Caudal brain stem, 353
electrical stimulation
preoptic area
rostral brain stem
Central amygdaloid nucleus, 147
cortex
hypoglossal motoneuron
rhythmical jaw movements
Central autonomic nuclei, 437
norepinephrine
serotonin
strain differences
Central catecholamine neurons, 737
MPTP
nigrostriatal system
Central nervous system, 497
dopamine release
in vivo voltammetry
phencyclidine
Cerebellum, 181
calcium-binding protein
immunocytochemistry
organotypic cultures

Cervical spinal cord, 701
  CA innervation
  dendrite bundles
  phrenic nucleus
Cervical vagal afferents, 401
  dogs
  dorsal motor nucleus of the vagus
  nodose ganglion
ChAT immunohistochemistry, 751
  fluorescent tracers
  limbic telencephalon
Chickens, 427
  5-hydroxytryptamine
  serotonin
  spinal cord, domestic fowls
Chronic administration, 155
  auditory evoked potentials
  medial geniculate body
  phencyclidine
  rhesus monkeys
Clonidine, 591
  body weight
  drinking
  eating
  hypothalamus
  norepinephrine
  paraventricular nucleus
Colchicine, 99
  neuroanatomy
  neurotoxicity
  septohabenulointerpeduncular system
Computer-assisted image analysis, 743
  hippocampus
  receptor autoradiography
Conditioned responses, 229
  harmaline
  locomotor activity
  nictitating membrane response
  rabbits
Cortex
  amino acids, 421
  central amygdaloid nucleus, 147
  cortical perfusion, 421
  hypoglossal motoneuron, 147
  push-pull perfusion, 421
  rhythmical jaw movements, 147
Cortical perfusion, 421
  amino acids
  cortex
  push-pull perfusion
Cortical spindles, 549
  arousal
  genetic factors
Cortical stimulation, 371
  bradycardia
  ^{3}H-2-deoxyglucose uptake
  depressor responses
  rabbits
Cricothyroid muscle
  brain stem motoneurons
  laryneal nerve
  monkeys
Cytoarchitecture, 163
  acetylcholinesterase
  histochemistry
  interpeduncular nucleus
  norepinephrine
Cytoskeleton, 813
  brain spectrin
  neuroblastoma
  neurochemistry

Data acquisition, 205
  Apple™ computer
  histograms
  microcomputers
  real-time data analysis
Delta sleep-inducing peptide, 833
  hippocampus
  immunocytochemistry
  subiculum
Dendrite bundles, 701
  CA innervation
  cervical spinal cord
  phrenic nucleus
Dentate gyrus, 39
  anisomycin
  long-term potentiation
  protein synthesis inhibition
^{3}H-2-Deoxyglucose uptake, 371
  bradycardia
  cortical stimulation
  depressor responses
  rabbits
Depressor responses, 371
  bradycardia
  cortical stimulation
